ACKNOWLEDGMENT...

I would like to express our special thanks to microsoft of gratitude to my teacher Mrs. Renu tyagi as well as our principal ma'am, who gave us the golden opportunity to do this wonderful project. This project also helped me in doing a lot of research and we came to know about so many new things.

We ~~are~~ extremely grateful to my parents and my friends who gave valuable suggestions and guidance for completion of our project. This cooperation and healthy criticism came handy and useful with them.

Hence, we would like to thank all the above mentioned people once again.

THE SUSTAINABLE [□]_□

Development Goals or Global Goals are a collection of 17 interlinked global goals designed to be a "shared blueprint for peace and prosperity for people and the Planet, now and into the future". Zero Hunger

After decades of steady decline, the numbers of people who suffer from hunger - as measured by the prevalence of undernourishment - began to slowly increase again in 2015. Current estimates show that nearly 690 million people are hungry, or 8.9 percent of the world population - up by 10 million people in one year and by nearly 60 million in five years.

The world is not on track to achieve zero hunger by 2030. If recent trends continue, the numbers of people affected by hunger would surpass 840 million by 2030.

According to the World Food Programme, 135 million suffers from acute hunger largely due to man-made conflicts, climate change and economic downturns. The COVID-19 Pandemic could now double that number, putting an additional 130 people at risk of suffering acute hunger by the end of 2020.

With more than a quarter of a billion people potentially at the brink of starvation, swift action needs to be taken to provide food and humanitarian relief to the most at risk regions.

At the same time, a profound change of the global food and agriculture system is needed if we are to nourish the more than 690 million people who are hungry today - and the additional 2 billion people the world will have by 2050. Increasing agricultural productivity and sustainable food production are crucial to help alleviate the perils of hunger.

BY 2030 We Want To Ensure Access By All People, To
Safe. Nutritious and Sufficient food All year Round.

PE

STRIKE

* Starvation pe Strike is an app look initiated by the children of police Modern School. It is formed under the "Sustainable development goal" of United Nation, whose objective is to end hunger & malnutrition by 2030.

* This app gave up the information about the food Camps in the specific location. It provide information to all poor ones.

* We would even ask some major Organization to be a part of our Campaign for a social welfare.

Since, we would be connected with the major of the food delivery app. It would

enable an option for customers to contribute according to their will & also ask the restaurants to include an optional amount to customers for contribute in our company.

Thirdly by the amount which have been collected yet would be used in organizing the camp which will provide a book person to afford at a very Reasonable price. and by the help of our app he will be able to locate our camp.

Here, the food would be provided at a very cheap cost but not of free as it will create a good perception about the campaign because they are not going to beg for it....
